

IVECO Group has identified carbon-neutral transition as a strategic priority. For this purpose, Iveco Group has decided to extend the initiative related to the vehicle electrification to meet the ambitious goal of reaching Net Zero Carbon by 2040. This is the mission of EVCO GmbH. A young, dynamic company with an interesting background. As a former Joint Venture with Nikola Corporation USA, EVCO GmbH has the start-up mentality and the diversity in its DNA. The position offered is crucial for EVCO GmbH to develop and enforce the know-how culture and IVECO Group's competitiveness on the market. Be part of our journey - join our team and make the difference!

For **EVCO GmbH** we are looking for a\*n

## Powertrain System Engineer (w/m/d)

Location: Ulm

Start: ab sofort

### Tasks:

- Define the powertrain system requirements and associated system requirements.
- Own the engineering tasks related to releasing, sourcing, and manufacturing including the BOM.
- Spearhead change management activities related to the powertrain.
- Represent the powertrain system during technical design and development activities.
- Collaborate with program management, manufacturing, design & development teams, purchasing to ensure on-time signoffs.
- Facilitate efficient issue/risk identification, communication, tracking, and resolution.
- Work towards becoming a subject matter expert for powertrain systems and integration.

### Requirements:

- Master's degree in Engineering – Mechanical, Electrical or related field.
- Several years of experience in releasing subsystems and components for automotive applications; BEV experience is a plus.
- Experience in requirements management and safety management for the EU, including functional safety and HARA.

- Strong understanding of system/component design/development, especially motor, inverter, and DC/DC.
- Self-starter willing to push system performance and cost reduction to meet company targets.
- Good communication and time management skills.
